SUSTAINALYTICS

Data Services

Sustainalytics' Data Services enables investors to integrate our research directly into their internal or third-party systems, such as Morningstar Direct, Bloomberg, Factset and Markit. With our highly reliable automated data delivery solutions, you will be able to create your own custom dashboards, databases, reports and other outputs using either data feeds or our Application Programing Interface (API) service.

Key Features & Benefits

1. Integrate Sustainalytics' research data seamlessly into the system you currently use and know

2. Load Sustainalytics company reports directly from your system

3. Select the data points you want to focus on and customize the display for optimal user interface

4. Rely on a secure and stable service with consistent, high-quality data

5. Improve internal oversight, helping to ensure compliance

6. Receive support from knowledgeable and experienced client servicing teams

Sustainalytics
Data Sets

Data points and company reports from the following products and services are supported by our Data Services offering:

» ESG Research & Ratings
» Corporate Governance Research & Ratings
» Controversies
» Product Involvement
» Global Compact Compliance Service

Corporate Governance Data

Through our partnership with Glass Lewis, we can offer the following raw corporate governance data for a universe of ~20,000 companies:

» Director Elections
» Board Independence
» Auditor
» Executive & Director Remuneration
» Shareholder Proposal Information

Overview: API and Data Feeds

	API	Data Feeds
	Sustainalytics' API is built using the latest technology and market standards. To improve ease of use, we've made the service language agnostic and with technical documentation available online that follows the OpenAPI / Swagger protocol.	The data feed service provides you with pre-defined standard or custom reports on a set frequency. The reports are saved directly onto your FTP folder for easy integration into your system.
Content	Data packages with data points from our different research products and company ESG reports (PDF)	Data packages with data points from our different research products and company ESG reports (PDF)
Delivery Method	REST API	(S)FTP
Frequency	On-demand	Pre-agreed intervals
File Format(s)	json	csv, txt, xml

Supported Third-Party Systems

The following third-party systems are among the most common platforms that support our Data Services:

» Bloomberg   » Morningstar Direct   » Rimes   » Glass Lewis

» Factset   » Markit   » Style Analytics
